

We need support with student discipline!

VEA conducted a survey of members specifically on the topic of student discipline at the end of last school year. Survey results were shared with administration at specific sites as well as with the district office administration. Some survey questions were repeated as part of the bargaining survey mid-year to check on improvements. In addition, the topic of student discipline continues to be a discussion at labor management. While there have been some improvements in the communication around

student discipline, there is still a need for supports and information in certain situations. Overall 35% of members rated the effectiveness of discipline at their site as being ineffective. Your VEA team has submitted proposals around student discipline through the bargaining process. The proposals ask for a known designee to deal with discipline if the principal is absent, safety equipment, staff training, staff notification of student history, and communication devices. Team VEA continues to advocate for you!!
